

# CAMPUS ALERT NOTIFICATION SYSTEM

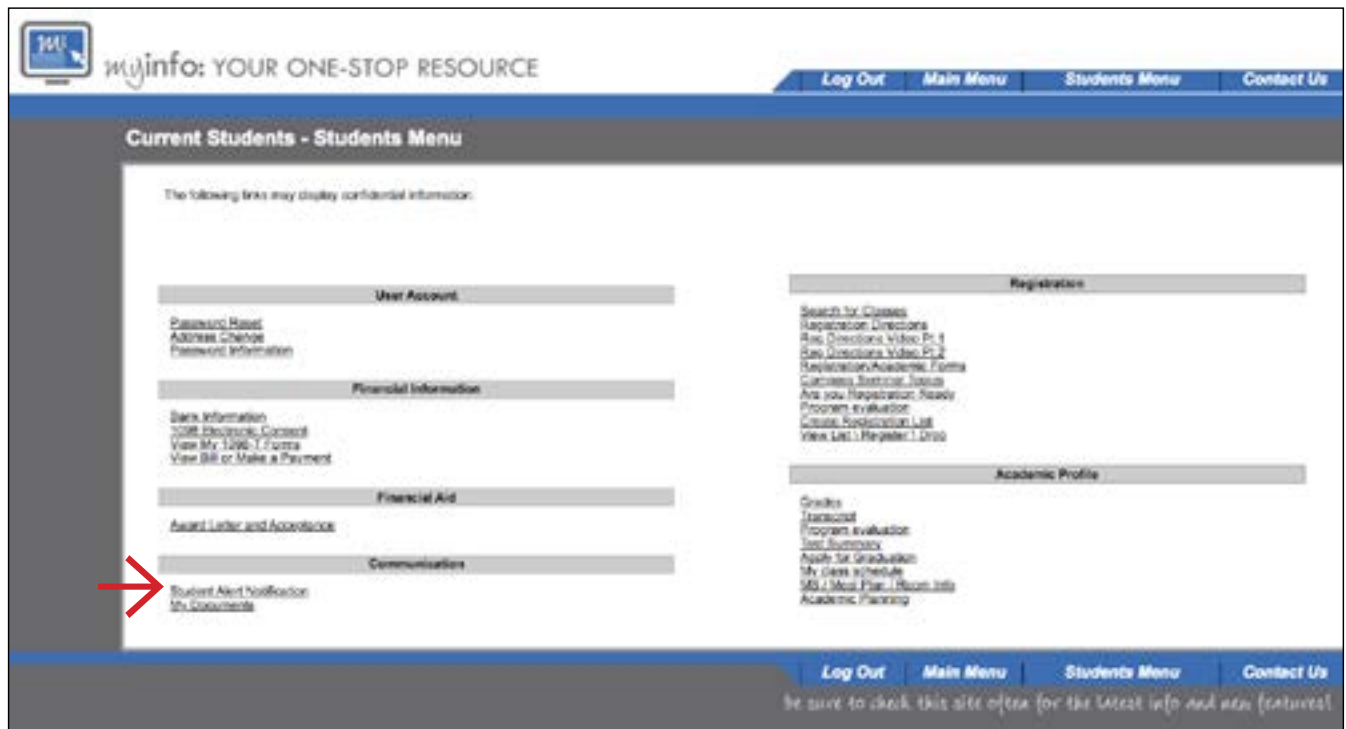

Clarke University operates a Campus Alert Notification System to notify you of campus emergencies or closing via e-mail, phone call and text message.

**It is very important that you update your information to ensure you receive alert information on your mobile or home phone.** By default, alert messages will always be sent to your Clarke e-mail account.

**First, log into your MyInfo account via my.clarke.edu**

Then, under Communication go to the **Student Alert Notification** in the lower left corner of the page. It is here that you can update or add information to receive emergency notifications.

The system will be updated with information provided at the **start of each semester**. Please act now to ensure that your information is correct and that you receive any emergency announcements.
