

OPEN

Not sure what to choose? That's part of the joy of going to college – it's a time to explore and be adventurous to find the right path for you.

I wasn't sure of my major. My advisor helped me select classes that would count both toward a science degree, biology, or chemistry, and as general credits. This allowed me to explore different topics to able to fully decide what path I wanted to choose without adding on semesters. Clarke will help you find the major that is right for you!

SHELLEY SHAFER, DO
Biology '08

BREATHE. YOU HAVE TIME.

Clarke helps students transition to college. We've designed the first years of your experience around making exploration possible.

- You meet with your advisor regularly during your first semester so that you are aware of the many options that are available.
- There is no need to claim a major until sophomore year and you can change your mind after that!
- Loving what you study means you will perform better as a student, which will lead to greater opportunities after college. Giving yourself time to learn about new disciplines can lead to finding a passion you did not even know you had.

We are here to help you through your discovery process. We'll help you schedule your courses so that you benefit from taking classes in various disciplines while completing university requirements. These classes will count toward graduation while allowing you to see a breadth of possibilities – all while still being able to graduate in four years.

TAKE A PEEK

Job shadowing and internships help provide opportunities to gather information on a wide variety of career possibilities before deciding where you want to focus your attention. Job shadows involve brief visits to a variety of workplaces, during which time you observe and ask questions of professionals.

25

Clarke has 25 undergraduate majors to choose from. The options are endless!

1:1
