Lofting Instructions

1) Insert the (4) steel pins in the lower wood ends. Note: Wood pieces are drilled on one end only.
2) Position the rear stabilizer on the 3rd or 4th pin from the bottom of the posts.
3) Select and position the bed spring at the desired height on the other two bed ends.
4) Set the two wood ends complete with spring on the four pins.
5) Position the safety clips on alternate posts. One front and one rear.
